RE: Store Kiosk Displays

Protein skimmers can be a good sale for your shop, good margins, and a customer that will return happy that their tank is doing well. D & D Marine Enterprises is the only company currently offering to help you make that sale. We have realized for some time that stores have to overcome a lot of problems in today's market to compete, and make the sale. D & D Marine has invested in you! We have produced a tool to help retailers cope with all of the pressures. You can have the advantage, yes even over mail order! The customer can walk into your store, see the product, and learn what it will do for their aquarium.

For some stores, it is the need to explain to a customer why a protein skimmer is a good investment and a wise purchase. For other stores it is simply the difficulty of finding the space to inventory another box !

Our Kiosk is designed to communicate to your customer the reasons why they should purchase a quality protein skimmer from YOU !

Our DVD presentation explains in an colorful video format, what skimmers do, What they remove, why they are important, and the details and selling points of our products. We will sell the product for you, our goal is for you to get the order. This display will educate your customer to the need, and your staff on the important selling points.

How to order a Kiosk display:

You can contact your distributor or if your distributor does not have them locally you can fill out the order form below and fax it to D & D Marine Enterprises directly. **Our order fax number is 502-747-0048**

We are selling these units below our cost. We believe that they are a very important sales tool for our dealers. The cost is \$82.50 plus UPS or Fedex ground shipping. This includes; a mounted skimmer, background board, DVD player, presentation DVD disk.
